

## WORKFLOW AUTOMATION

### Work Smarter, Not Harder.

When tasks are automated into controlled sequences, businesses can save significant resources. At Engineation, we streamline workflows into unified packages that save companies manpower, time, and money.

Our proven track record with efficiency-based solutions helps companies gain a competitive edge. From real time loan processing to live video production, we turn complexity into buttons and clicks.

DEVELOPMENT**

● **WORKFLOW  
AUTOMATION**

● **MOBILE  
APPLICATIONS**

● **SYSTEMS  
INTEGRATION**

# SOFTWARE DEVELOPMENT

When businesses thrive at maximum octane, they focus on customers, not technology.

Engineation creates rock solid software solutions that empower you to better serve your clients. The infrastructures we design fluidly integrate across other IT ecosystems, and prepare you for growth. Our successful track record spans a broad scope of projects across a wide range of industries.

# MOBILE APPLICATIONS

4 out of 5 consumers use smartphones to shop\* but only 19% of US retailers have a mobile commerce application\*\*

\*comScore - \*\*eMarketer

As consumers become more reliant on mobile devices, businesses have an opportunity to capture more revenue.

# SYSTEMS INTEGRATION

Unify Frameworks for Power & Efficiency

When databases and applications work smoothly together, duplicate work and room for error are eliminated.

Engineation leverages the benefits of your technology and adds efficiency to your IT environment. We streamline systems into unified workflows and thoroughly document each interface.

## ● Custom Software Development

## ● Big Data & NoSQL solutions

## ● Database Design & Architecture

## ● BI Tools & Data Mining

## ● Cloud and Private Cloud Migration

## ● Business Continuity Planning

Engineation helps you capitalize on the growing mobile landscape and engage more customers. We create stunning applications with deep functionality and test-driven stability.
